Abstract

Mold Yourself is a web application helpful for users to practice for interviews. Nowadays many companies are conducting interviews virtually through online mode. So developing a system where users can practice for these online interviews are really useful. This system will help candidates to practice for mock interviews by facing mock interviews. It also provides feedback including facial preference, head nodding, reaction time, speaking rate and volume to let users know their own performance within the mock interview. Results are given in a graphical format by using these two or more interviews can be compared to track the progress of the candidates and corrective action will be taken in order to give better performance in the next interviews.
